## DETAILED ACTION

Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, explaining how the claims avoid the references or distinguish from them.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

The following claim 2, drafted by the examiner and considered to distinguish patentably over the art of record in this application, (Chandler) presented to applicant for consideration:

2. A fishing bobber device comprising:

two half spheres of a buoyant medium, hingedly attached at one point by an elastic cord, a spring and hinge, or a steel spring, which are locked in placed over a fishing line by a lever mechanism consisting of two levers which force said half spheres open for insertion of said fishing line, and subsequently allow said half spheres to close around said fishing line when levers are released by a user, and the lever mechanism, in which the levers consists of a thin piece of hard plastic attached the flat portions of said half spheres, and extend outward approximately  $\frac{1}{2}$  inch at a 45 degree angle from the flat side of said half spheres.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Chandler US 5440831.

Regarding claim 2, (as best understood) Chandler discloses a method of securing a bobber to a fishing line by clamping said bobber onto a fishing line between two half spheres 34 held together under pressure using either elastic cord, a spring, or very light spring-steel 36, 37, and then using a lever system to open and close said half spheres (col 10, lines 36-48, col 11, lines 5-7).
